

## Java programs:

```
package example;
import java.util.Scanner;
public class Sample {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        int a=sc.nextInt();
        if (a>0) {
            System.out.println("Positive");
        }
        else if (a==0) {
            System.out.println("Neutral");
        }
        else {
            System.out.println("Negative");
        }
    }
}
```
